

Before Sunoco will enter into a franchise dealer relationship with you at this location, you must provide Sunoco with the number and type of tanks comprising your Underground Storage Tank (UST) System ("UST System") on the premises and certify the integrity of the UST System, and that the subject UST System is in compliance with applicable federal and state requirements.

Please find attached a "Dealer Description of Underground Storage (UST) System" (Attachment A), and an "UST System Certification of Tightness" (Attachment B). These forms must be reviewed, carefully completed, signed by you, and returned to Sunoco. In addition, you must provide Sunoco with either copy of your monthly monitoring results for the USTs, lines and leak detector, or a full UST System test (Tanks Line and Leak Detectors) by a third party indicating test date and certifying your system is tight. All requirements indicated above, must be provided and acceptable to Sunoco before Sunoco will execute a Dealer Supply Franchise Agreement.

If you have any questions on this matter, or as to information required in the attached forms, please contact your Sunoco Sales representative or Local Area Manager.

Dealer's Description of Underground Storage (UST) System**

Date _____
SMA _____
Name _____
City, State, Zip _____

Before Sunoco, Inc. (R&M) ("Sunoco") executes a Dealer Supply Franchise Agreement with Prospective Dealer covering the premises indicated above, Dealer must provide Sunoco the following information concerning the premises and Underground Storage (UST) System.

Dealer hereby certifies that the following information regarding the UST System located on the above premises is true and correct as of the date of Dealer's execution of this document.

A) The UST System is in compliance with all applicable Federal and State regulatory requirements, including but not limited to corrosion protection, spill and overfill protection, and leak detection.

Number	Size	Construction	Installation Date

- B) Sunoco does not have, nor has it ever had, any ownership interest in this UST System.
- C) As of the date of this Certification, there has been no discharge, spillage, uncontrolled loss, seepage, or infiltration of any petroleum products and or hazardous waste at the above described premises.
- D) Dealer is aware of his legal responsibility to report any such discharge, spillage, uncontrolled loss, seepage or infiltration to federal, state and local authorities, and is responsible for clean-up of the same, including, but not limited to, the proper handling of any contaminated soil or water.

I certify the above information is true and correct.

**ATTACHMENT B
UST System Certification of Tightness Dealer's Underground Storage (UST) System**

Before Sunoco, Inc. (R&M) ("Sunoco") will execute a Dealer Supply Franchise Agreement with Prospective Dealer covering the premises indicated above, Sunoco requires that it receive either a copy of your most recent monthly monitoring results for the USTs, lines and leak detector, or a full UST System test (Tanks Line and Leak Detectors) conducted by a third party. Such test must be approved by the appropriate Regulatory Agency and conducted by an authorized contractor hired by Dealer. Consistent with the following requirements, the test results must indicate the test date and certify that the Underground Storage (UST) System is tight and without leaks, as of the test date.

If an UST System test is conducted:

- A) Approximately sixty (60) days prior to the end of Dealer's current motor fuel supply contract, Dealer shall arrange to have the required test performed on the UST System by a certified contractor. The State will, at Dealer's request, provide a list of qualified contractors to perform such test.
- B) All costs associated with such test shall be borne by Dealer.

If Dealer's UST System monthly monitoring indicates a loss or the UST System fails the test, or contaminated soil and/or contaminated surface or ground water is found on the premises, Sunoco may refuse to execute a Dealer Supply Franchise Agreement until all System repairs and/or replacements necessary to certify the UST System tight, and/or the disposition of such contamination, have been undertaken by Dealer, consistent with applicable laws and regulations.

This letter sets forth the entire understanding between Dealer and Sunoco concerning the condition of Dealer's UST System, and the condition of the premises, which must be met prior to the execution and performance of a Dealer Supply Franchise Agreement. There are no other promises, understanding, or agreements of any kind relating to UST System, which are not set forth herein.

I hereby accept and agree to be bound by the above terms and conditions.
